

Respiratory System Game

Match each part of the lung with the work it does.

Pulmonary alveoli	Connective tissue membrane that lines each lung
Lungs	Connects the nostrils to the larynx
Larynx	Where oxygen enters the circulation and carbon dioxide to exits
Bronchioles	Extension of the trachea that bring air in and out of the lungs
Nostrils	Receives air from the pharynx and takes it to the trachea
Bronchi	Entry and exit of air
Trachea	The conduct air into the alveoli
Pleura	Where oxygen and carbon-dioxide exchange take place
Pharynx	Brings air in and out of the lungs
